Protecting the Future

The Sigmarine Single Pack Alkyd Range

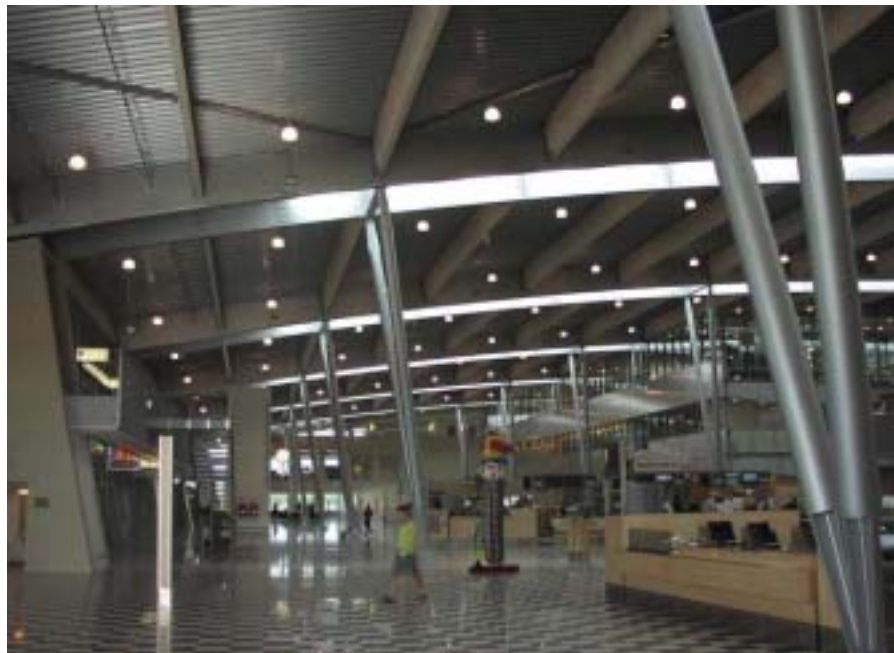

Sigma Protective Coatings is dedicated to the development, manufacture and supply of coatings to meet the very challenging needs of specific industries. With a heritage of outstanding expertise in coatings technology and decades of international investment in research and development for the protective coatings market, no company could be better placed than Sigma to meet the fast-changing global challenges of this technically demanding sector.

Sigma Coatings offers a full range of single pack alkyds for the protection of steel structures for internal and external exposure in light industrial environments.

Products are available in a full range of colours including some shades pigmented with micaceous iron oxide.

The range consists of primers which have excellent anti-corrosion properties, together with intermediate and finish coats to give weather resistance and colour retention.

- Good anti-corrosive properties for atmospheric conditions
- Good adhesion to pre-treated steel / aluminium
- Good weather resistance
- Good colour retention
- High opacity
- Available in any colour
- Easy to apply with excellent flow characteristics

Sigmarine Range

Sigmarine 49

A single pack high gloss finish based on alkyd resin

- Good application with brush and roller
- Full range of colours available
- Excellent colour and gloss retention
- Good weather resistance
- High opacity
- Good colour retention
- Excellent secondary flow characteristics
- Excellent maintenance coating

Sigmarine 48

A single pack, general purpose gloss finish, based on modified alkyd resin

- Good application with brush and roller
- Full range of colours available
- Good colour and gloss retention
- Economical choice
- Very good maintenance coating
- Certified for low-flame spread (see information sheet 1883)

Sigmarine 41

A single pack semi-gloss finish based on alkyd resin

- Good application with brush and roller
- Full range of colours available
- Good colour and gloss retention
- Good weather resistance
- High opacity
- Excellent secondary flow characteristics
- Excellent maintenance coating

Sigmarine 35

A single pack micaceous iron oxide intermediate / topcoat based on alkyd resin

- Good barrier properties
- Selected range of colours available
- Good UV resistance

Sigmarine 24

A single pack zinc phosphate primer based on modified alkyd resin

- Selected colour range
- Fast drying
- Lead / chromate free
- Good anti-corrosive properties for atmospheric conditions

Sigmarine 40

A single pack intermediate / buildcoat based on alkyd resin

- Good application with brush and roller
- Full range of colours available
- Good adhesion to single pack primers
- Good drying properties even at low temperatures

Sigmarine 39

A single pack semi-gloss aluminium finish based on alkyd resin

- Aluminium look
- High brilliance
- Heat resistant up to 175 °C / 347°F
- Good barrier properties

Sigmarine applications

The Sigmarine range is widely used and respected in all key industry sectors, meeting the very demanding challenges required to protect major assets.

Infrastructure

- Buildings
- Warehouses
- Bridges
- Port authority
- Railway equipment

Civil building

- Sports stadiums
- Airports
- Local authority buildings

Performance you can trust

All our coatings are manufactured to world-leading standards. So you can rely on a consistent performance from each and every coating in the Sigmarine range.

The Sigmarine Range Renamed

Sigmarine 49 (*replacement for Sigmaferro Gloss*)

- A glossy alkyd based finish

Sigmarine 48 (*Sigmarine BTD*)

- A glossy economical alkyd based finish

Sigmarine 41 (*Sigmaferro Semigloss*)

- A semigloss alkyd based finish

Sigmarine 40 (*Sigmaferro Buildcoat*)

- Alkyd based buildcoat

Sigmarine 39 (*Sigmarine Aluminium HR*)

- Alkyd based aluminium finish

Sigmarine 35 (*Sigmaferro Miocoat*)

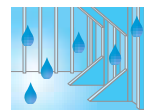

- Alkyd based micaceous iron buildcoat / finish

Sigmarine 24 (*replacement for Sigmaferro primer ZP*)

- Alkyd based zinc phosphate primer

Internal dry

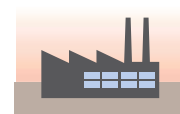

Internal wet

Economical

Ease of application

Resistant to industrial polluted areas

Worldwide Support Services

Sigma Coatings field technical support staff are among the most highly skilled and trained in the coatings business. With in-depth knowledge of the working realities facing the industries we supply, our technical experts offer an unsurpassed perspective on the coatings options that can help your industry to function optimally, maximising technical performance and minimising expensive down time.
